Micah Boswell

Lead Product Designer, Enterprise Platforms and AI

Dallas, TX · 214-543-2098 · micah@conscious-shell.com · conscious-shell.com · linkedin.com/in/micahboswell

Lead Product Designer with thirty years in enterprise software, the last five on AT&T's network-management and cloud-connectivity portals. Former VP of Experience Design (Treverity) and Creative Director (Broadlane), still hands-on: I prototype AI agents at AT&T and run them live on my own products. Results on record: $300K+ in hardware savings at AT&T, errors down 48% at GE Nuclear, revenue up 20% at the U.S. Mint. Fluent in Spanish.

EXPERIENCE

Lead Product Designer · AT&T — 2021 - Present

- Lead designer for AT&T's network-management and cloud-connectivity portals (DNI Portal, NetBond), working with product, API engineering, and global marketing on tools that enterprise customers and network operations teams run every day.
- Redesigned DNI Portal diagnostics to expose underused hardware; targeted decommissioning saved more than $300K. Built VLAN migration and triage tools that cut resolution time from weeks to minutes.
- Won roadmap approval for NetBond SDCI with an executive prototype, then partnered with API engineering and global marketing to productize its APIs.
- Introduced AI design practices to the product design group: led the enterprise Lovable AI pilot, wrote its templates and playbooks, and trained teams adopting AI in their work.
- Prototyped AI agents for network operations that present evidence, propose a fix, and wait for approval before acting, and the portal assistant that previews every change and keeps a plain-language audit trail.
- Designed a visual network designer that unifies geographic, topology, and circuit views in one interface, replacing a patchwork of separate tools. Patent pending.
- Built the Insight Engine proof of concept: AI turns a UX research archive into cited, confidence-rated findings that a researcher approves before product managers can query them. Handed to AT&T's Power Platform team, July 2026.
- Built an AI video pipeline that scripts, narrates, animates, and masters on-brand product-demo films; four delivered in September 2026, including one for AT&T executives.

Founder and Designer · Independent products — 2025 - Present

- Built and run Roots (familyroots.center), a paid family-history subscription with an AI family historian on Claude; its research workflow scored 93/100 against an accepted lineage record.
- Built Helen, a personal AI operations agent: a TypeScript MCP server (68 tools) running as a service behind the scheduled tasks that run my daily operations, with human approval gates, plus public MCP servers that let AI assistants use my sites as tools.

CX/UX Consultant · Wells Fargo (via Granite Solutions) — 2020 - 2021

- Led CX/UX design across eight consumer-product departments that had never shared a design language, aligning their product strategy on common customer journeys and templates.
- Built the bank's first cross-department component library for consumer products, replacing eight competing libraries with one.

UX Mentor · CareerFoundry — 2019 - 2025

- Mentored 47 UX and UI designers one-on-one and shaped the curriculum as a member of the Instructor Advisory Board.

VP Experience Design and Board Advisor · Treverity 2016 - 2020

- Led experience design for a utility-software company: design ops and modular libraries for 20+ energy-grid products (EDGE, Utility360, Duty Roster, Damage Assessment, Home Service Plus), tied into development workflows.
- Designed the control-room dashboards CenterPoint Energy used in the Hurricane Harvey emergency response (flood levels, road elevation, outage mapping) and field apps that worked offline.
- Design work was a material part of the company's acquisition by ARCOS.

UX Innovation Lead · Citi (via C2G) 2016

- Redesigned 68 mobile tap-to-pay workflows across Latin America, Asia, and the U.S., and built the pattern library the offshore implementation team worked from.

UX Lead · GE Nuclear (via Kraybill) 2012 - 2016

- Owned ACUMEN, GE's core-monitoring platform, end to end: led the consolidation of hundreds of legacy Fortran applications into role-based dashboards, cutting user errors 48% with federal compliance intact.
- Wrote the usability standards, style guide and user manual; built the design system and rapid-prototyping process; personas, executive decks, a NUREG position paper.

UX Consultant Strategist · U.S. Mint (via PFSweb) 2013

- Set the first persona-driven e-commerce strategy for a government retailer, grounded in buyer interviews; tailored purchase paths cut cart abandonment 31% and lifted revenue 20%.

EARLIER

Lead UX Architect, Hitachi Consulting. Set portal style standards and ran heuristic assessments across eight style guides.

Senior UX Architect, The Richards Group. Pier1.com e-commerce architecture.

UX Architect, Dell (via Possible Worldwide). Rebuilt Dell.com search around customer intent, using a taxonomy drawn from search logs.

Creative Director, Broadlane. Rose from designer to creative director; branded 21 products; the CEO credited design in the sale to MedAssets.

Interactive Art Director, Perot Systems. Hospital sites for Tenet and Catholic Healthcare West.

Healthcare Design Lead, IMC2, NCH, GlaxoSmithKline. Interfaces for Eli Lilly, the ADA, and GSK.

Senior Web Designer, Nortel. First tech role.

SKILLS

AI product design	Agent workflows, approvals and audit trails, trust and uncertainty, conversational assistants; Claude Code, MCP, Lovable
Design systems	Component and pattern libraries, design tokens, style standards, design ops
Research	Interviews, personas, journey maps, usability testing, heuristic evaluation
Prototyping	Figma; working code in TypeScript and HTML/CSS; narrated product films with Remotion and ElevenLabs
Accessibility	Contrast and color-blind safety; author of chart-color-audit, an open-source checker on npm

EDUCATION AND RECOGNITION

Education	B.A., Hardin-Simmons University, Abilene, TX. eCornell certificates in AI Strategy, AI for Business Productivity, and AI Applications and Value Creation (2025-2026).
Recognition	Patent pending (AT&T): graphical user interface for multi-abstraction network topology design. AT&T Connection Award four years running, 2023-2026. Author of A Guide to Data-Driven Design. Photographer with 53M+ views on Unsplash.
Languages	English and Spanish (fluent, raised in Lima, Peru)
